

Gallardo & Lamas Offer Advanced New Treatment for Missing Teeth

[Miami Periodontists](#) Achieve Superior Results with All-On-4™ Treatment

([PRWEB](#)) May 29, 2013 -- Gallardo & Lamas Periodontics and Implant Dentistry of Miami, Florida, is pleased to offer their patients the All-on-4™ procedure, the most advanced treatment for replacing unhealthy missing teeth or removable dentures with beautiful new, non-removable teeth.

Tooth loss is a problem for many. In fact, tens of millions of people in the U.S. are missing teeth or facing tooth loss due to tooth decay and gum disease. Contrary to what many think, tooth loss is not just a cosmetic concern. Missing teeth can lead to problems with eating, speaking and nutrition. Furthermore, when a tooth is lost, the teeth can begin to shift which, over time, can lead to a sunken look in the cheeks and jaw. While there are many options for replacing missing teeth, including removable partial or full dentures, there are often drawbacks associated with these.

[All-on-4™ dental implants](#) are a revolutionary treatment designed for people who are missing all of their teeth or facing the loss of all of their teeth. The All-on-4™ system uses just four non-removable dental implants per arch which are strategically placed to take advantage of the dense bone in the front portion of the jaws. This makes it an option even for individuals with insufficient bone to support traditional dental implants. In fact, most individuals are candidates for the All-on-4™ system, including removable denture patients, individuals who are about to lose all of their teeth, and those with gum disease related bone loss.

Best of all, with All-on-4™ dental implants, most patients are able to have the implants inserted and their new non-removable teeth attached on the very same day. Traditional dental implants require multiple visits over the course of several months. With All-on-4™ implants, you can replace your missing teeth with a set of beautiful new teeth in just one day and usually without the need for bone grafting. That means there's no prolonged healing time as with traditional implants. All-on-4™ dental implants look and feel just like natural teeth.
